Metropolitan Cleaning Services

Was created by the union of several cleaning service companies of the North-Eastern United States. These companies have been in this industry since 2002 and throughout those years, experience was gained in various cleaning services. Some of these including commercial, industrial, and healthcare. Our main objective is to always maintain high quality services, respect the surrounding environment and uphold our costumer above all.

Commercial Cleaning

- Office Cleaning Services.
- Healthcare Cleaning Services.
- Bank and Financial Institutions
- Dentistry Center.
- Warehouse Buildings.
- University & School Cleaning Services.
- Retail Cleaning Services.
- Auto Dealership Cleaning Services.
- Post Construction Cleaning Services.
- Fitness Center Cleaning Services.

Disinfection Systems

Our cleaning protocols and disinfection systems follow the highest standards to help eliminate 99.9% of viruses of every exposed surface in your building. We disinfect viruses responsible for common colds and the flu, resistant pathogens like MRSA and COVID-19, or harmful bacterias like salmonella and E. Coli.

Electrostatic Disinfection

Electrostatic disinfection is an incredible scientific disinfecting process that applies itself on every surface side. Meaning that objects are going to be EPA approved 99.9% germ-free. This is front to back, top to bottom, and every inch in between, sanitized by a broad spectrum of virus and germ killers.

Here's how it works:

1. Most surfaces are naturally negatively charged.
2. Electrostatic sprayers run disinfectant through one or more batteries, causing the disinfectant to become positively charged, and searches out a negatively-charged surface particle to pair with.

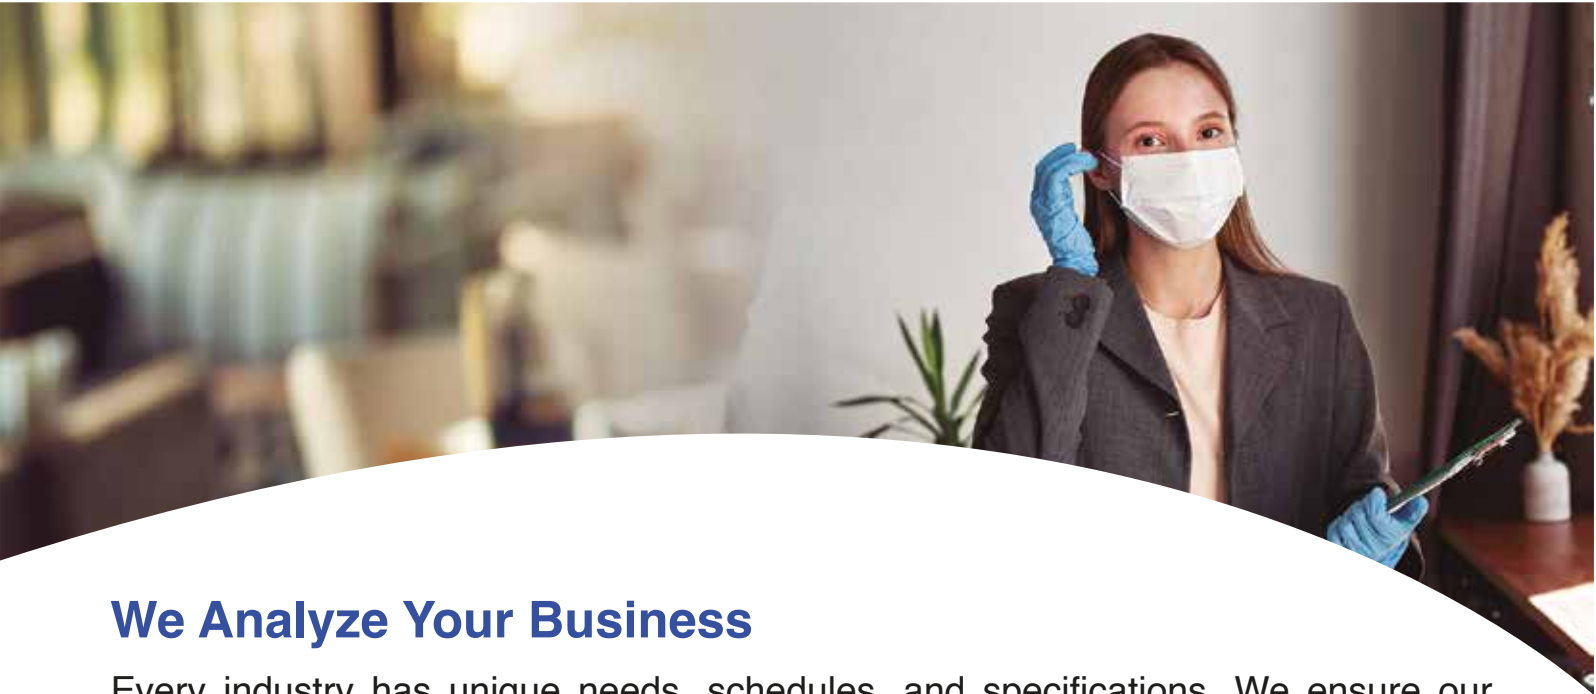

High Touch Points

HTP are items or areas which are continuously frequented. These HTP are prone to harboring germs and viruses, such as common colds or the flu.

HTPs include:

- Doorknobs and handles.
- Light switches.
- Faucet and toilet flush handles.
- Telephones.
- Computer keyboards.
- Breakroom appliance handles.
- Copiers.
- Elevator buttons.
- Pin Pads.
- ATM's.

We Analyze Your Business

Every industry has unique needs, schedules, and specifications. We ensure our team will receive specialized training on the specific requirements of each industry.

Services

We help your company focus on their core business and have no worries about janitorial cleaning services
